the statement that the so-called "appe-tizers" for fattening stock consist largely of sugar. All animals like sugar, and will eat it when other food is refused. -The Farm Journal is authority for

—Lemon Cookies: One cup of sugar, two-thirds cup of butter, one-half cup of warm water, and one-half teaspoon-ful of soda. Flavor with lemon essence and use just flour enough to roll out; bake in a quick oven. - Toledo Blade.

-Discolored tea and coffee pots may be cleaned by filling them with water in which two or three tablespoonfuls of wood ashes have been placed and letting it boil up, then wash thoroughly with hot soap-suds, and rinse.—*Chicago*

-Corn Starch Cake: Two cups of powdered sugar, one cup of butter, three-fourths cup of milk, the whites of six eggs, three-fourths of a cup of cornstarch, two cups of flour, three table-spoonfuls of baking powder mixed into the flour; flavor with lemon.—Boston

-To keep worms and bugs of all kinds from books, sprinkle some insect powder on the shelves at the back, and tie a small piece of camphor in a cot-ton bag and place in the same place. This camphor bag is also a good thing to place in the plane to keep moth from the felt-pads. — Chicago Times.

-Skimmed milk and grass alone will raise good calves if the milk is abundant, and not allowed to become sour, says the Agriculturist. When too sour it causes scours, which counteracts its good effects. Skimmed milk is rich in numino'ds and phosphate of lime, thus giving a strong muscular and bony development. A little flax seed will improve it, as it prevents constipation

-Mothers too often make the mis take of satiating their children with too great a variety. As soon as a child tires of one toy, for example, there is another substituted, and discontent is the certain result. The mother of four children, of whom the oldest was eight and the youngest two, told me that she had never had any trouble in amusing them, because they were taught to play a variety of plays with the least possible number of toys. - Albany Journal.

—Sugar Gingerbread: One cup of sugar and one-half cup of butter rubbed together; one cup of sour milk, one-half teaspoonful of saleratus, a little salt, and flour enough so that you can roll it out; place it in the pan, indent with a teaspoon, put a little speck of butter in the cavity, and so on through the dough, making these dents an inch apart, then sprinkle on cinnamon all over the top, and over that sprinkle granulated sugar, taking care always to have the sugar last. If you do not have sour milk, take instead two teaspoonfuls of cream of tartar with one of saleratus.—The Courier.

ORDER ON THE FARM.

Harmony and Punctuality Important for

Many farmers fail in making their farms profitable from want of order. Whether on a small farm where the work is all done by the owner, or on a large farm where the work is done by several hands, there must be a regular and early hour for rising in the morning. Each hand or man should know.

on the evening previous, what is to be done the next day. If chores are his first employment, he can go at them without waiting for orders. If he is to use a team, he can have it fed, curried and harnessed ready, the wagon or implace, ready to hitch to.

short with common callers and yet be courteous. He can by a judicious sys-tem and the study of the situation intem and the study of the situation in-courage any ambitious help to excel in their labors. Be always at home to counsel, direct and aid in all departments. Strive to cultivate a good feeling between la-borer and employer. Have stated times for meals, for milking and commencing the regular work, also for retiring from the field. Make the farm produce su-perior crops and also strive to raise the

perior crops and also strive to raise the best kinds. All products of the farm, garden, vineyard or dairy should be put up hon-

estly, yet in the most attractive manner If business or pleasure takes you away from the farm let the family know the precise hour of your return, and let then know by your punctuality that your engagements are reliable. Make all worthy hands, boys on the farm of female help in the house, feel that they are your equal in rights and respectability.

Order, harmony and punctuality are

important for success in any enterprise, whether on the farm, in the work-shop or the store. - D. H. Morris, in Western

FANCY SWINE.

How to Obtain New Vigor Without Part-

ing with Marketable "hape. Those who have bred and fed the finer kinds of swine can hardly be expected to take a step backward, parting with any portion of the shapeliness to which they have been accustomed. It may not be wise to do this, but an important question is, how can those who breed for feeding purposes mainly, or wholly, keep up the symmetry, easy fattening tendency and general style which belongs to a first-class market hog? After a score or more of years have been occupied by the advocates of in-and-in breeding, and they have been numerous, the list of these has dwindled down, and those possessed of intelligence, and who have kept their eyes open, keep up this advocacy in a manner greatly modified, and qualify their sayings more than formerly. The best framed sentences in advocacy of a practice, the results of which an observing man, though he runs can see, count for but little, and eventually fall to the ground entirely if the outcropping uestion is, how can those who breed to the ground entirely if the outcropping proofs point in a direction opposite to the arguments.

the arguments.

Improvement as regards swine bred for feeding, can be effected easily, without part ng with shapeliness or fattening tendency, simtly by crossing one breed of improved twine with another, the two having no direct kinship or blood in common. The great refinement found in high-bred swine in general, undeniably weakens the vitality of the hog and his powers of resisting disease. Now, in the crossing of two opposite breeds, though both are what are termed fine, new vigor is obtained without parting with the marketable shape, and in place of lessening the fattening tendency this is manifestly increased.

National Live Stock Journal.

—Three hundred and forty patients were admitted to the insane asylum at Napa, Cal., during the past year.

THE GENIE ELECTRON.

pany, recently read a paper before the distance in space and scrutinizing its Electrical Society of Buffalo on the spirit features as it rolls before him, we may of electricity, or, as he calls it, "The Genie Electron." The genie performs an important part in almost all the op-erations of nature, but generally in so quiet a manner that his presence is never known or even suspected, except in the occurrence of something calculated to arouse him to anger or opposi-tion. "It is," said Mr. Buell, "in the bright clouds, far above the earth, that he sometimes likes to nestle, or when their bases touch the mountains, and their white tops shine in the far-off ether, he will stretch forth his powerful form and seem to bathe himself in the tenderest purple of distance. At other times he will softly breathe his spirit in the air, sigh, and send his moan along the woods and moorish fens, and up among the loose, disjointed cliffs as the sad notes of the coming storm. When the black-winged leg ons of tempest arise, he delights in leaping from cloud to cloud, and the tremendous roar of h s voice is rolled back from the mountain's bosom as the recognition of the dazzling brightness of his flashing eye. 'Calm and serene he drives the furious blast, And pleased th' Almignty's order to per-form, Rides in the whirlwind and directs the

The exhibition of his fearful strenth at such times makes cowards of us all. Fear, full of feeble fancies, makes us weak and unmanly, loosens in us every power and allows our imagination to create fantastic shapes of the hideous ruin he may cause. The immensity of his force naturally inspires mankind with terror and awe, and, until recently, they have looked upon him more in the light of God's minister of punishment and destruction than as the friendly and beneficent, though powerful, be-ing they are discovering him to be. His favorite place of retrement is in the d ep inter or of the earth, and while thus pent up, and finding no ready means of escape, he will sometimes break the bonds of his prison, and in doing so shake the earth for miles around, leaving great rents in it, overturning build ngs, destroying I fe and property, as was so forcibly demon-strated in the earthquakes at Charleston and vicinity,"

After referring in detail to some of

the famous earthquakes of modern times, Mr. Buell asked whether it is not possible that the cause of these dis-turbance is due to the chemical action of which "Electron" is supposed to be the immediate agent. "When the parti-cles of different kinds of matter are free to mingle with each other, which by means of heat, air, water and other media, they can be made to do, 'Electron' can make them change their arrangements and can subject them to such magical transformations that they became entirely new substances, with qualities essentially different from the r previous condition. The presence of sub-terranean waters is ableto bring about a greater and more prompt accumulation of electric ty in the parts of the ground that are near to them, the metallic veins or conducting rocks that penetrate to great depths and extend to great distances are apt to convey, according to tances are apt to convey, according to their direction, any quantity of 'Electron's' spirit. Might not the subterranean noises, very similar to rolling thunder, which generally precede and frequently accompany violent earthquakes, be caused by the explosion of this accumulated electricity, and which we might term subterranean lightning? we might term subterraneau lightn'ng? If we obtain such enormous quantities of his spirit on a small scale, as we do from our voltaic cells and from our dynamo machinery, is there any reason to doubt that in the interior of our are carried on upon a scale of magni-tude almost beyond our conception. when a d scharge of this nature occur, that it can be of sufficient force to produce undulatory waves, and to lift the crust of the earth at such points as the force may happen to be the greatest?"-N. Y. Evening Post.

CAUCASIAN BRIGANDS.

Band of Robbers Who Defy and Conquer the Russian Troops

A band of audacious highwaymen has for more than one year perplexed the Russian authorities in the Caucasus. The band is composed of Caucasians, and the chief is a certain Khiaram, or Kerim, who performs extraordinary acts of cun ning and courage. About the end of last winter a large body of troops—horse and foot—succeeded in surrounding Khiaram and his men, and surrounding Khiaram and his men, and the chief commander of the troops had already telegraphed to Tiilis that Khiaram could not make his escape, but the next morning he disappeared. Four months later the authorities received a message from Khiaram himself, announcing that he has passed some time far from h s "dear country," but that he had returned to "recombut that he had returned to 'recom-mence his bus ness.' In a few days the central author ties received reports from Kars that Kh aram and his band were killing, plundering and burning throughout the district. The troops under the command of Prince Chair-chavatse, chief of the Koutais regiment of cavalry, pursued the band, but to no purpose. When the horses of the high-waymen became tired Khiaram gave the order to kill them and to take horses from the villagers. In this way they reached the frontier; the soldiers there who tried to prevent them from pass ng were k lled; and Khiaram and his men crossed the frontier on the back of the horses of the dead sold ers. Some weeks ago Khiaram returned to his "dear country," and many travelers were plundered forthwith. The authorities felt they ought to make a supreme effort to re-establish their prestige; they united a great force and Khiaram was surstates that Khiaram and all his men have again succeeded in escaping, after an active battle lesting about five hours. and during which many soldiers were killed or wounded. The brigands broke through the soldiers' chain and passed on to Turkish territory. These exploits would scarcely be possible were not the brigands in some degree supported by native population.—St. Petersburg Cor. London Times.

—The ringing of the door-bell, which is an electric enunciator, roused Captain C. G. Lyon from his slumbers at the family residence on Golden Hill about five o'clock Wednesday morning. He found the hall full of smoke, and discovered that a box of ashes in the cellar had ignited and the blaze had communicated to surrounding wood work. A had ignited and the blaze had communicated to surrounding wood work. A hand extinguisher quickly quenched the fire, and but little damage was done. The wire of the annunciator passed over the spot where the blaze started, and the heat had lengthened a spring and permitted the closing of the circuit, which caused the bell to ring.—Bridgeport (Coun.) Farmer GEOLOGICAL POINTS.

Surprising Features Which a Bird's Eye View of the Earth Would Disclose. Madison Buell, the repeater chief of FII we imagine an observer contemthe Western Union Telegraph Com- plating the earth from a convenient supposed him to be struck with the fact that eleven-sixteenths of its surface a e covered with water, and that the land is so equally distributed that from one point of view he would see a hemisphere almost exclusively oceanic, while nearly the whole of the dry land is gathered in the opposite hemisphere. He might observe that the great oceanic area of the Pacific and Antartic Oceans is dotted with isignds-like a shallow pool with stones rising above its surface—as if its general depth were small in com-parison with its area. He might also notice that a mass or belt of land surrounds each pole, and that the northern ring sends off to the southward three vast tongues of land and of mountain chains, terminating respectively in South America, South Africa and Australia, toward which feebler and insular processes are given off by the Antartic continental mass. This, as some geographers have observed, gives a rudely ee-ribbed aspect to the earth, though two of the three ribs are crowded to-gether and form the Europ-Asian mass or double continent, while the third is isolated in the single continent of America. He might also observe that the northern girdle is cut across, so that the Atlantic opens by a wide space into the Arctic Sea, while the Pacific is contracted toward the north, but confluent with the Antart c Ocean. The Atlantic is also relatively deeper and less cumbered with islands than the Pacific, which has the higher ridges near its shores, constituting what some visitors to the Pacitic coast of America have not inaptly called the "back of the world," while the wider slopes face the narrower ocean, into which for this reason the greater part of the drainage of the land is poured. The Pacific and Atlantic, though both depressions or flattenings of the earth, are different in age, char acter and conditions; and the Atlantic, shough the smaller, is the older, and from the geological point of view, in some respects, the more important of the two. If our imaginary observer had the means of knowing any thing of the rock formations of the continent, he would notice that those bounding the North Atlantic are in general of great age, some belonging to the Laurentic system. On the other hand, he would see that many of the mountain ranges along the Pacific are comparatively new, and that modern ingenious action occurs in connection with them. Thus lantic, though comparatively narrow, is an older feature of the earth's surface while the Pacific belongs to more modern times .- Sir William Dawson, in

Popular Science Monthly. KRONBORG FORTRESS.

A Floor-Bed Made of the Bones of Capi

tally Condemned Prisoners. Perhaps no part of the Kronborg fortress in Elsinore has a more fascinating interest than that which lies under ground. The portion of this underround space commonly visited by travelers is that of the casemates lying im-mediately below the basement story of the building. These casemates, running under the castle's entire extent, are said to have frequently accommodated in the days when the structure was a veritable fortress a thousand soldiers. A traveler recently visited them. He says: "Behind, a soldier selected as my guide and provided with a huge pine torch, which he held in one hand while retaining in his other an unlighted torch for reserve, I accordingly made the descent into this feudal inferno. As we proceeded as a dazzling spot against surrounding blackness, its rays seemingly effectual only to heighten the intense gloom of the place. From the walls cozed in places a trickling slime, while from the roof extended the hardened limy secretions of centuries. My guide suddenly stopped at a broken wall partially closing one end of a narrow chamber, whose apparently earthen floor was raised about eighteen inches above that of the surrounding passageways. 'Try this floor with your cane,' said the soldier, addressing me. Following his direction, I prodded the bottom of the vault in a dozen places, and threw up from its black surface with every movement of mr walking-stick a fragment of bone! Wherever, indeed, this surface was pierced, the stratum un-derneath was discovered to be a compact deposit of decaying bones and animal matter. 'Look at the opposite wall yonder, 'said my guide, speaking again, 'Long ago,' he continued, this was the place of the last cotinement of certain prisoners capitally condemned by the State. They were thrown into the chamber en masse and walled in from this end. A pitcher of water was set in the aperture of the wall there, and that was the last they received of food or drink. They died of starvation and madness, and fell in a heap, making this floor a bed of human bones, as you see; this wall falling away long after-ward making the feaful discovery."-

CINCINNATI, Nov. 16.

The British Empire.

It is pointed out that the British Empire extends over a far larger territory than that which was governed by ancient Rome, the superficies of the latter being one million and a half square leagues. No English speaking people is under foreign rule, whilst Britain governs nearly three hundred million individuals belonging to all nations and speaking all the languages of the world; as, for instance, Germans (Heligoland), Spaniards (Gibraltar), Greeks, Italians, Turks (Cyprus), Arabs (Aden), Dutch (Africa), French (Mauritius), Chinese, Indians, Persians (Asia), etc.—Christian

THE COCAINE HABIT. The Worst Slavery Known-New Revela-

Cincinnati Times-Star When cocaine was discovered the medical world exclaimed "thank heaven!" But useful as it is, it is also dangerous,

especially when its use is perverted from the deadening of pain for surgical operations, to the stimulation and destruction of ing and captivating, but the thralldom is the most horrible slavery known to hu-

Manity.

J. L. Stephens, M. D., of Lebanon, O., was interviewed by our reporter yesterday at the Grand Hotel, and during the conversation the doctor said: "The co-caine habit is a thousand times worse than the morphine and opium habits, and you would be astonished." he said. "If you knew how frightfully the habit is increasing."

"What are its effects?"

"It is the worst constitution wrecker
ever known. It ruins the liver and kidneys in half a year, and when this work is
done, the strongest constitution soon suc-

done, the strongest constitution soon succumbs."

"Do you know of Dr. Underhill's case
here in Cincinnati!"

"That leading physician who became a
victim of the cocaine habit! Yes. His
case was a very sad one, but the habit can
be cured. I have rescued many a man
from a worse condition."

"What, worse than Dr. Underhill's!"

"Indeed, sir, far so. Justin M. Hall, A.
M., M. D., president of the State Board of
Health of lowa, and a famed practitioner,
and Alexander Neil, M. D., professor of
surgery in the Columbus Medical College,
and president of the Academy of Medicine,
a man widely known, Rev. W. P. Clancey,
of Indianapolis, Ind., from personal experience in opium eating, etc., can tell you
of the kind of success our form of treatment wins, and so can H. C. Wilson, formerly of Cincinnati, who is now associated with me."

"Would you mind letting our readers

ment wins, and so can H. C. Wilson, formerly of Cincinnati, who is now associated with me."

"Would you mind letting our readers
into the secret of your methods!"

"Well, young man, you surely have a
good bit of assurance to ask a man to give
his business away to the public; but I
won't wholly disappoint you. I have
treated over 20,000 patients. In common
with many eminent physicians, I, for
years made a close study of the effects of
the habits on the system and the organs
which they most soverely attack. Dr.
Hall, Dr. Neil and Mr. Wilson, whom I
have mentioned, and hundreds of others,
equally as expert, made many similar experiments on their own behalf. We each
found that these drugs worked most destructively in the kidneys and liver; in
fact, finally destroyed them. It was then
apparent that no cure could be effected
until those organs could be restored to
health. We recently exhausted the entire
range of medical science, experimenting
with all known remedies for these organs,
and as the result of these close investigations we all substantially agreed, though
following different lines of inquiry, that
the most reliable, scientific preparation,
was Warner's safe cure. This was the second point in the discovery. The third was
our own private form of treatment, which,
of course, we do not divulge to the public.
Every case that we have treated first with our own private form of treatment, which, of course, we do not divulge to the public. Every case that we have treated first with Warner's safe cure, then with our own private treatment, and followed up again with Warner's safe cure for a few weeks, has been successful. These habits can't be cured without using it, because the habit is nourished and sustained in the liver and kidneys. The habit can be kept up in moderation, however, if free use be also made, at the same time, of that great remedy."

"Yes, it is a world fame I and justly celebrated specific! Like many other physicians, I used to deride the claims made for it, but I know now for a fact that it is the world's greatest blessing, having sovereign power over hitherto incurable diseases of the kidneys and liver, and when I have neys and liver

power over hitherto incurable diseases of the kidneys and liver, and when I have said that, young man, I have said nearly everything, for most diseases originate in or are acgravated by, a depraved condition of the kidneys."

"People do not realize this, because, singular as it may seem, the kidneys may be in a very advanced stage of decomposition, and yet owing to the fact that there are but few nerves of sensation in them the subject will not experience much pain therein. On this account thousands of people die every year of kidney disease unknowingly. They have so called disorders of the head, of the heart and lung; and stomach, and treat them in vain, for the real cause of their misery is deranged kidneys and if they were restored to health the other disorders would soon disappear."

Dr. Stephens's experience, that can be confirmed by many thousands whom he has treated, adds only more emphasis to the experience of many hundreds of thousands all over the world, that the remedy he refers to is without any doubt the most beneficent discovery ever given to humanity.

A TURN-STYLE—The fashion of wearing enffs among impocunious dudes.—Merchant Traveler.

Common Sense

should be exercised in taking a remedy for catarrh. It is caused by impurity in the blood; hence the groper method of cure is to purify the blood. Hood's Sarsaparilla is the best blood purifier, and has had wonderful success in curing catarrh. Give it a trial. He sure to get Hood's.

"I suffered severely from chronic catarrh, arising, I believe, from impure blood. It became very bad, causing much soreness of the bronchial tubes, and a troublesome cough, which gave great anxiety to my friends and myself, astwo brothers died from bronchial consumption. I tried many advertised medicines for catarrh, both inhaling and internal; but it was simply money thrown away, as I received medicines for catarra, both inhaling and internal; but it was simply money thrown away, as I received no benefit. I was at last induced to try Hood's Sarsaparilla, and I am not the same man in health or feelings. My catarrh is cured, my throat is entire well, and a dyspeptic trouble accompanied by sick headache have all disappeared." E. M. LINCOLN, & Chambers Street, Boston.
